

Company

For 60 years PVR has been a leader providing high quality and reliable vacuum pumps. PVR means primarily trusted and advanced technologies, but also sustainable development for the stakeholders, environmental protection and focus on energy saving. The experience acquired during these years of activities, allows PVR to offer products and services that are always reliable and innovative.

sevencom.it

Provide trusted & advanced technologies

Machining Division

With a view to verticalization of its processes and increased capacity to provide more services to customers, PVR has had a specialized Machining Division for brass, steel, cast iron, stainless steel, and aluminum components since 2023.

Professionalism, experience, and quality characterise PVR Machining Division in the machining of numerous parts for vacuum pumps and components in the industrial, automotive, petrochemical, hydraulic, and electrical sectors.

DRY C - CR Dry claw vacuum pumps

Service

PVR guarantees a qualified advice for every inquiry thanks to its skilled technical/sales office that supports every project. The Service Department assists and advises our customers with scheduled maintenance, qualified overhauls and spare parts ready for delivery.

DRY C - CR Series

Dry claw vacuum pumps

DRY C series have been designed for those applications where the handled medium must remain contaminant free during the process. The absence of wear parts in these pumps offer considerable savings in maintenance and associated downtime.

Applications

Bottle fillings
Milk production
Evisceration systems
Pneumatic conveying plants
Granule conveying systems
Plastic extruders

Pick & place systems
Hospital central vacuum
Ozone generators
CNC routers

Glass, ceramic and pottery industry
Water and soil remediation
Printing machines
Central vacuum systems

Optional and accessories

Suction filter
Vacuum regulating valve
Safety valve
Silencer

DRY C 157

Dry claw technology

HCT version

The HCT version of the DRY C series pumps consists of a surface treatment of the rotors to increase the resistance to water vapour and corrosion. The special treatment and the absence of wear parts allow considerable savings in terms of both maintenance and machine downtime.
