

Company

For 60 years PVR has been a leader providing high quality and reliable vacuum pumps. PVR means primarily trusted and advanced technologies, but also sustainable development for the stakeholders, environmental protection and focus on energy saving. The experience acquired during these years of activities, allows PVR to offer products and services that are always reliable and innovative.

sevencom.it

Provide trusted & advanced technologies

Machining Division

With a view to verticalization of its processes and increased capacity to provide more services to customers, PVR has had a specialized Machining Division for brass, steel, cast iron, stainless steel, and aluminum components since 2023.

Professionalism, experience, and quality characterise PVR Machining Division in the machining of numerous parts for vacuum pumps and components in the industrial, automotive, petrochemical, hydraulic, and electrical sectors.

Service

PVR guarantees a qualified advice for every inquiry thanks to its skilled technical/sales office that supports every project. The Service Department assists and advises our customers with scheduled maintenance, qualified overhauls and spare parts ready for delivery.

Rotary Lobe Vacuum Pumps HV - HV/BP Series

www.pvr.it

HV Series

Roots pumps for high vacuum

Vacuum blowers HV Series have been designed for conveying air and neutral gases and are especially used in industrial high vacuum technology. With its extended range of models, a nominal capacity from 180 m³/h to 97.000 m³/h is covered. The pressure ranges from 10-3 mbar up to approx. 200 mbar abs.

Applications

Packaging machines
Vacuum chambers
Thermoforming machines
De-aeration tunnels
Freezing chambers
Dryers
Oil decontamination
Chemical processes

Degassing materials
Drying medicinal products
Solvent recovery systems
Distillation systems
Drying transformer systems
Lamps and bulbs

Semiconductors
Solar panels
LCD panels
Motor/transformer impregnation process
Autoclaves
Leak detectors

Laboratories
Thermoforming packaging machines
Metallizing
Heat treatments
Central vacuum systems

Gmb 16.13 HV

HV EX Special Series

Roots pumps for Atex environments

Vacuum pumps HV Series as well as vacuum pumps with canned motor CM series have been approved according to directive 2014/34/EU and certified for Atex Zone 0 (inside), temperature class T3 (200°C). They are certified for zone 1 outside, temperature class T4 (135°C).

HV/BP Series

Roots vacuum pumps with bypass valve

Roots vacuum pumps HV/BP Series complete with bypass valve are mainly used coupled to a backing pump to speed up pumping down times and to achieve vacuum level up to 0.02 mbar abs.

The bypass valve allows to start the Roots pump at the same time as the backing pump, protecting the Roots pump from any operation at high overpressure.

GMa 13.7 HV/BP
